# PROJECT TITLE: WOMEN SAFETY

## ABSTRACT:

Women's safety is a big concern which has been the most important topic till date .Women safety matters a lot whether at home ,outside the home or working place .In today's world, people using smart phones have increased rapidly and hence, a smart phone can be used efficiently for personal security or various other protection purposes. The heinous incident that outraged the entire nation have waken us to go for the safety issues and so a host of new apps have been developed to provide security systems to women via their phones. This Android Application for the Safety of Women and this app can be activated by a single click, whenever need arises. A single click on this app identifies the location of place through GPS and sends a message comprising this location URL to the saved contacts to help the one in emergency situations. Location tracking information via SMS helps to find the location of the victim quickly and can be rescued safely.
