

# **QUIZZY BOX**

## **ABSTRACT**

This work deals with development of android-based true or false question examination system, namely: QUIZZY BOX. This application is developed for educational purpose, allowing the users to prepare the multiple choice questions for different examinations conducted on provincial and national level. The main goal of the application is to enable users to practice for subjective tests conducted for admissions and recruitment, with focus on General Knowledge field. This quiz includes two functions: (i) Next and (ii) Back which are collectively named as life lines that help users to answer questions correctly. These functions can be used many times by a user.
