

CREAMY WORLD

ABSTRACT

The ice cream app is a virtual store on the internet where customers can browse the catalogue and select the products on their interest. The selected items may be checked in ordering cart. At checkout time, the quantity of the ice cream and its price will be given as an order. At that point, additional information will be required to complete the transaction. Usually, the customers will be asked to fill in or select a billing address, shipping address and payment information (such as cash on delivery). Shops are generally closed on their specific days but ONLINE ICE CREAMS will be open all the time for the service of the people. ONLINE ICE CREAM is a very fast technique for ordering ice cream at home. People don't need large places for their shops; they can run these shops by sitting at their home with the help of internet. So in general, ONLINE ICE CREAM's only motive is to provide the best quality of ice cream tools in time and without taking any efforts and providing a good service to each and every member of the society. Products can be managed by operators from the admin panel. Operator can be created by admin. Admin can keep track of orders through the admin panel. The main purpose of the system is to enable customers to browse and order from any part of the world and hence increasing business scope. The project has been developed to allow business to grow larger and faster.
