

## **MEDICINE TIME**

### **ABSTRACT**

Medicine time is a medicine reminder app which is used to remind us of taking prescribed medications. It also has alarm which rings on the respective time like morning, afternoon and night. We can also set the alarm at regular intervals like 1 hour etc. We have also established a text box in which we can save the name of the medications. All the entries saved will not be erased from the memory but rather saved in the history tab. It helps people to take medications so as they do not miss it. Medicine is a portable user friendly app. Especially designed for the people's who have to take the medicines on time
