

PROJECT TITLE: FLORAL O PETALS APP

ABSTRACT:

With the rapid development of Internet, e-commerce had been widely using by more and more people, so had shopping online. An florist's shop online system (Floral o Petals) was designed and implemented based on the analysis of the actual needs of users. The main objective of this project is to develop an attractive, interactive and user friendly online selling app. The system could achieve flower sales online that was highly efficient and convenient, and the design purpose was achieved also. Flower bouquet is the sign of gratitude that one gives to the near and dear ones to make them feel happy. Flower bouquet is the collection of different flowers that is arranged in a creative way. You can also have a flower bouquet filled with not only flowers but also chocolates. It can be used for the home decoration or the public buildings or can be given to the near and dear ones. At the end, this project will satisfy the needs and requirements of the customers and the major problems faced by the current can be solved through this project.
