

Title: Pick A Place

ABSTRACT

In this digital world, every service needs an application to comfort users with ease. Mobile application plays a very important role in the travel and tourism industry. Travel has changed a lot over the decades, people travel not just to find new places but to rediscover themselves. Pick A Place is a travel discovery platform that is helpful in finding the best travel destination. This application starts with a user verification that request to either login or signup. It is easy to pick a best place to visit from the list of popular cities including Paris, Dubai, Singapore etc. Users can not only find famous places but also some real view pictures, description and rating gathered from the wanderers. This offline travel guide makes travel pre-planned using the valuable information that has been provided. The aim of this android application is to let people experience places like never before with the guide to various places for sightseeing and adventures.
