

# **STATIONERY SHOP APPLICATION**

## **ABSTRACT**

The main aim of the project is that the process involved in managing and selling of stationery products can be automated. The world is becoming technology driven and we are living in an era of Internet. The Stationery store provides all different types school related items. In mobile solution we are providing mobile version of shop and user can explore whole stuffs on the tip of fingers without going to actual store and can pay when they received the package as well as we are providing exclusive feature where we putting offers on few items for a month and every month items will be updated. This android application allows the user requested to signin with an email address and a password. Stationery products are categorised according to various ranging from Pen, Pencil, Notebooks, Geometry box, etc... can be available in affordable prices. And what is more interesting is that Stationery shop is available in cash on delivery option also. Inaddition, we are giving request option where customer can request new items.
