

PROJECT TITLE : SUPER SPIN

ABSTRACT :

The project is entitled as “ **SUPER SPIN** ” . As the technology increasing day by day most of the work is made easier by software applications run on mobile. We are living in the 21st century which is known as the “Mobile World”, where almost every kind of work is carried out with the help of mobiles. In this project, we are introducing a concept of having remote access to book a scooty of our desired wish with payment through our mobile application which is supported by Android operating system. Our Scooty Booking application is designed with the registration facility in which the customers are registered with personal details. This application is designed with functionalities such as Login, Booking Report, Online Payment, List of the vehicles and their costs, Access .In this scooty booking project , we are providing an individual account for users with a email id and unique password by giving them registration option. . They can log in into their own account through the internet from any remote access area. SUPER SPIN is available in a mobile which runs on Android OS as an Application on your fingertips. This Application has all facilities for the user to select a scooty, book a scooty, payment through online. Login facility for users .The main purpose of this project is to maintain easy Booking of scooty for user desired Transportation.
