

PROJECT TITLE: TAKE TREATS

ABSTRACT :

In this fast moving world people are always busy to step out of their house and get things done. People always prefer online for almost everything .So to meet the customers satisfaction the cake delivery app called “**TAKE TREATS**” is been developed using the android studio. Take Treats is an app which provides the customer or the user to order their desired cakes through online. We ensure safe payments. Take Treats is a system that allows users to check for various cakes available at the online store and purchase online. The project consists of list of Cakes displayed in various categories. We have two types of categories : Egg and Eggless. The user may browse through these items as per categories. If the user likes a product he can place an order. He can pay through cash on delivery .You can give instructions in the app such as the name that has to be written on the cake. You can also mention on which date the cake has to be delivered. Thus, the online Cake shopping project brings an entire cake shop online and makes it easy for both buyer and seller.
