

## PROJECT TITLE : BITRACKER

### ABSTRACT:

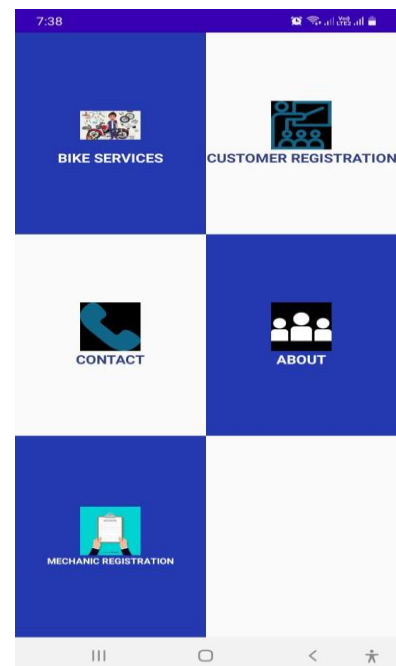

The Project is entitled as **“BITRACKER APP”**. Technology is on a boost, Now a day. People wish to live a luxurious life with minimum physical work. Here we provide a mobile application for „Bike Service System“. This application is an android app which can be run on any android compatible and mobile phones. The user can send request for pick and drop, appointment for servicing, test drive as well as .The dealer processes these requests and gives a response back to the user through push messages. Online Bike Service Application This app also enables the user to set date for next servicing date, payment of insurance installment, etc. Thus we are developing an application which goes hand in hand with the new age technology and characterizes – user friendliness, in informativeness and time saving. A door step bike servicing Platform and application which will use technology for the convenience of two wheeler owners by providing them a transport connection with high quality vehicle Maintenance providers
