PROJECT TITLE: SPA AND SALON

ABSTRACT:

This application is all about Spa And Salon which allows people to register their hair style and make their payment through this app. All they have to do it just to install this application and check our profile. We have provided they contact details of our branch for verification. They can pick their hair style from the hair style category and can proceed further to payment. We do offer few packages, which they can go with. We offer both online and offline payment. We do offer google pay facilities. Once they are done with these things they can go to the particular branch and can make their hair cut. The first page of the app has six categorise. The first category is "ABOUT", which lets people know about the salon. The second category of the app is "OFFERS" which lets people know the offers which we provide in our spa and salon. The third category is about "CONTACT DETAILS", where we provide all the contact and verification details our customers. The fourth category is "GALLERY", where we provide few pictures of our sap and salon and the fifth category is "REGISTERATION", category where you can register the hair styles so that you can proceed further this register category will also provide you few option so that you can choose any one of the hair style from the following and the sixth category is "PAYMENT", we do provide payment options like online or offline payment. Online payment we do have option for google pay and so on.
