PROJECT TITLE: CARE AWARE CONNECT

ABSTRACT:

This project is entitled "**CARE AWARE CONNECT**". The main objective of this project is to provide the easiest way to fix the appointment on the online. This project is convenient for doctors and patients. This project is reduced the time of everyone because time is important for everyone. With this project everyone knows about the hospital and everyone knows the history of medicine. There are two types in the login section, one is **user login** another one is **doctor login.** The doctor login is providing the facility to view the appointment of the patient. In the user login section, the user need to enter his/her username and mobile number to login, once the user enters the login he/she is provided with five different menu activities (i.e.) **about=** where he/she can know about the hospital and doctors. **Gallery**= where he/she can get to know visuals of the hospital and the treatments. **Doctors details** = where he/she can view the types of departments present in the hospital and the doctors present for the respective departments. **Appointment**= where he/she can fix their online appointments by filling their details and selecting their respective departments. **Contact**= where he/she can contact the hospital through their mail. In the doctor login section, the doctor can enter his/her details and can register their names in the doctor details section. Through this app both the user and the doctors can save their time and make appointments and registration easier.
