# PROJECT TITLE:STUDENTS ATTENDANCE APP

ABSTRACT

Managing the attendance using a traditional approach is a cumbersome process. The person must maintain the attendance record in registers and files using paper and pen. The problem with this approach is that it requires lots of paper and manpower. Managing attendance using mobile phones provide an alternate way for this. It is maintaining daily basis of attendance. The staff will be provided with separate username and password to make student attendance. The staff handling the subject is responsible to take attendance for all students only if the student presents the date, the attendance will be calculated.
